E-COMMERCE:-

1- Custom Design Platform:-

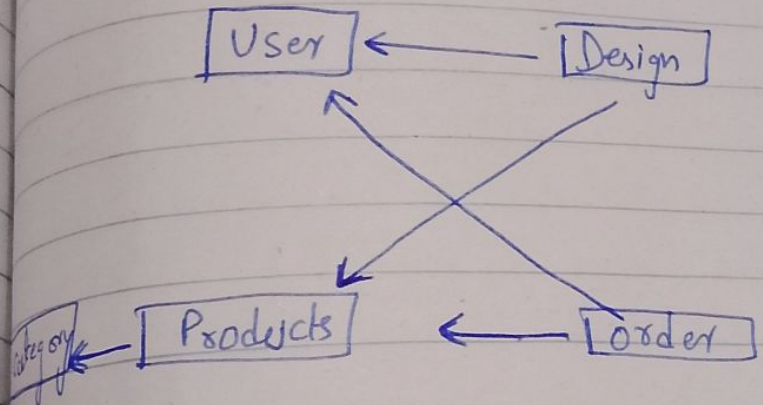

Allow users to upload their designs or choose from templates, customizing color, patterns and text to create unique clothing pieces.

Create Platform where users design their own clothes using customizable templates or upload their designs. Add features like 3D previews and AR try-on for a realistic view of their creations. Offer eco-friendly fabric options and host design contests to engage customers.

Q What problem solve in market place

A Custom design e-commerce store solve the lack of variety and personalization in traditional clothing stores, offering tailored fits and unique designs. It provides a platform for independent designers to showcase their work and reach to broader audience. Additionally It supports sustainable fashion by reducing mass production.
